

## Plants

Plants are important for people. They provide food for us. Plants produce oxygen. We need oxygen to live. Plants grow from small seeds. In spring we plant seeds in the ground. Seed need sun and water to grow. After some days the seed breaks open. A little sprout starts its way to the surface. The sun helps the plant to grow. In the sun, the plant turns green. The roots hold it in the ground. The plant makes its own food in the leaves.
